

ID: _____

Condition: _____

Before the study

- ☐ Recruitment screening: <link>
- ☐ If selected: **email** consent form: <link>
- ☐ Consent receipt: study, audio, video
- ☐ Reserve room for observation OR send zoom link
 - ☐ Update calendar event with location and Zoom link (for recording)
- ☐ **Email** event confirmation and zoom link
- ☐ Copy this doc for each participant
- ☐ Make a copy of the starter code folder and rename it with the PID

5 min: study debrief and questions

Study overview

Thank you for joining us today. I would like to give you a brief overview of the study today. We are assessing a third-party tool notebook extension for creating plots in matplotlib called Plottery.

First, we will give you a tutorial on Plottery. Then, you will complete three plotting tasks using Plottery. You will complete all the tasks on our laptop. After the tasks, you will complete a brief survey and a short interview reflecting on your experience with the tool. Any questions so far?

[Optional] filling out consent form

-- If they haven't submitted the consent form --

It looks like you haven't submitted the consent form yet. Can you please take a minute and sign it right now? I can send you the link.

<consent-form-link>

Study purpose and requirements

Great. The study overall shouldn't take more than 90 minutes. If you need to stop the study and leave at any point, you can of course.

Please keep in mind that this study is about understanding the usage of Plottery. It's not about checking your ability to write code or solve tasks. If you don't finish your task, or get stuck, that's totally fine.

Besides using Plottery in specific tasks, you will have access to google search and a built-in AI assistant. Depending on the task, you will use one or more of these tools. We will let you know which tools you will use for each task. Let me know if you have any concerns.

Screensharing and recording

And finally, for this study, I will ask you to share your **entire screen through Zoom and we'll be recording the session. The recording will only be available to me and a few other researchers on the team. Is that ok with you? Great, I will begin recording now.**

<click record to cloud>

10min: Tutorial

User will follow the tutorial themselves. Time it.

- Verbally mention the meaning of `...`: it means there is no derived default value but the user can still change to things on their own
- Verbally mention that runtime errors will appear at the end of the plot and might prevent plots from updating
- Verbally recap anything missing from the user's tutorial

10min: Boxplot Task 1 + TLX

Working solution:

```
ax.boxplot(durations, labels=groups)
ax.axhline(y=time_limit + -5.7, color=(0.90, 0.39, 0.40), linestyle='-.')
ax.set_title('My Plot')
```

[if user failed, send the working solution to them]

10min: Boxplot Task 2 + TLX

15min: Subplot Task + TLX

5min: between-task transition

15min: Post survey and interview

User will first type out answers to a few questions in the post-survey

If remaining time: ask about interesting behavior

ASK: how does having access to **Plottery** compare to your usual workflow of creating mpl plots?

ASK: comparing the three experiences of using **Plottery**

ASK: did you know how to solve each of the tasks when starting out?

ASK: when would directly manipulating the plot or changing properties be more helpful overall?

<=5 min: post-study logistics

Stop recording(s)

Thanks for participating in the study! I'll stop recording now.

Quit the recording on Zoom

Snowball recruitment

Do you have colleagues or friends who use matplotlib? Would you be willing to help us recruit one person for the study? We could follow up with you with the material you can forward

The end

Do you have any other questions?

Once again, thank you so much for your time.

- ☐ Stop recording
- ☐ Snowball recruitment
- ☐ Other questions

Post Session Checklist

- ☐ Download and upload the recording to the g-drive
- ☐ Upload user files to g-drive
- ☐ Update <participants spreadsheet> accordingly (study completion flag)

Misc Notes
